

Greetings,

I'm seeking your permission to attend a technology conference in May 2015 in Lancaster, PA.

Tech Talk *Live* is a two-day conference that offers over 40+ technical sessions on five different learning tracks. More than 200 IT professionals supporting education (K-20) from this region will be at there.

Tech Talk *Live* will offer a comprehensive highly technical content-led program, including sessions on topics directly related to system administration, network administration, application development, desktop support, and technology leadership. Peer and technology experts will share ideas on how to test and implement new, transformative technologies.

They also have a pre-conference boot camp: Cyber Security Institute that will be filled with informational hands on sessions by legal, data breach, and information-security experts along with sessions provided by select cyber security experts that will allow me to deep-dive into implementations of products we are already or are considering using.

The conference fee is \$450, with special incentive if I register early, for three full days, which includes one full day focused on cyber security. There are multiple attendance options that we can discuss. The fee includes lunch each day, as well as networking activities, a dinner event, and the conference/expo entry.

You can learn more about the conference and expo on the Tech Talk Live website, [www.techtalklive.org](http://www.techtalklive.org).

Thank you for your consideration,
